**(Gameplay) Can a clanbattle end in a draw?**

Yes, clanbattles can end in a win. Loss or even a **draw**, depending on the cb length setup.

**(Gameplay) Do I have to play the complete cb length although we have already won?**

Yes, you always have to play the complete cb length, because not only the cb outcome will be rewarded. Each single game/round will be rewarded as well.

**(Gameplay) On a split host, who gets map pick on the 2nd server?**

Always the guest clan gets the first map pack(GhRIII.2 and RvSIII.3).

**(Gameplay) What if a player crashes during the middle of a match?**

If a player crashes during the game, the game continues(you have to play shorthanded). An AI Playercounts as regular player, in the case the crashed player gets replaced with an AI player by the game(II.2) Once you have finished the game shorthanded you have 5 minutes to replace the crashed player or wait until he is back. If you can't find a replacement or if the crashed player doesn't come back you have to finish the cb shorthanded.

**(GhR) Can each team pick a specific map or 1 pick per map per cb?**

A single map may only be chosen once during the entire cb, regardless of which clan chooses said map(III.2)

**(GhR) Can you replay the maps that were draws?**

No, each map can only be played once during an entire cb(III.2).

**(GhR) What do you do in result of a draw: replay that map or the team that didnt pick the map gets pick?**

In the case of a tie, the map and game mode selection goes to the clan, who did not choose the previous map and game mode(III.2), but the map can't be chosen again by any clan.

**(AA) Where can I find cb rules for America's Army?**

Due the lack of rule feedback, the rules may not consider the latest AA versions. You are free to change the rules and or add your own rulesets to this thread, until we add a final version to the \*DBL rules.
